## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed Nov. 13, 2006 have been fully considered but they are not persuasive.

In response to applicant's argument regarding to **claims 1 and 7** that the references fail to discuss a **graphical password**. Examiner respectfully disagrees the Sugimura discussed about the biometric password such as fingerprints, face picture authentication ...etc (see paragraph [0059]). Therefore it is proper to describe as **graphical password**.

In response to applicant's argument regarding to **claims 23 29 and 54** that the references fail to discuss a **graphical password input unit**. Examiner respectfully disagrees the Sugimura discussed input of biometrics data such as camera, a fingerprint scanner...etc (see fig.1, element 1, paragraph [0031]). Therefore it is proper to describe as a **graphical password input unit**.

In response to applicant's argument regarding to **claims 47 and 52** that the references fail to discuss **comparing an input graphical password to a register graphical password**. Examiner respectfully disagrees the Sugimura discussed biometric authentication is conducted only in case where it is determined that biometrics authentication can be conducted (see abstract). Since the biometrics authentication can be conducted then it is inherent that the authentication device must be compared the graphical passwords such as fingerprint using the fingerprint scanner. Therefore it is

proper to describe as **comparing an input graphical password to a register graphical password.**

With these broadest interpretations have been explained above. Therefore the previous rejection is maintained.

### ***Conclusion***
